Fast Data Integrity for Sage 300

Available for $1,295 + $325 per year, Fast Data Integrity performs Sage 300 integrity checking operations in a fraction of the time taken by the standard utilities. Tests on large databases show 100x-1000x performance gains. **Interactive** and **schedulable** versions of the program are provided.
Watch an overview: https://vimeo.com/605846172

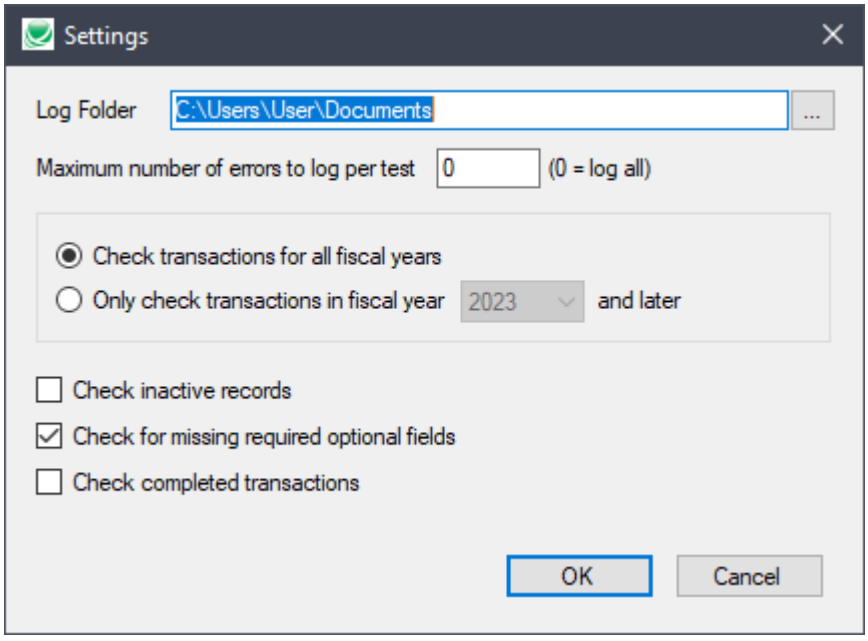
"I would just like to say ... WOW! On the client's largest entity, over 200 gig, it typically takes a day to run a DI on just one of the modules (AR, AP or GL). It ran in 6 minutes on AR! I can also say it found and reported on the errors that I was expecting."
Kimberly Kyle, Sage 300 Certified Consultant.

"The native data integrity ... took over 3 days ... Fast Data Integrity ... less than 1.5 hours."
Bruce Warrell, NextLevel Information Solutions.

"Subject: Re: Fast Data Integrity ... Darn that thing is fast !!!!!"
Paul Field, Net@Work.

Options

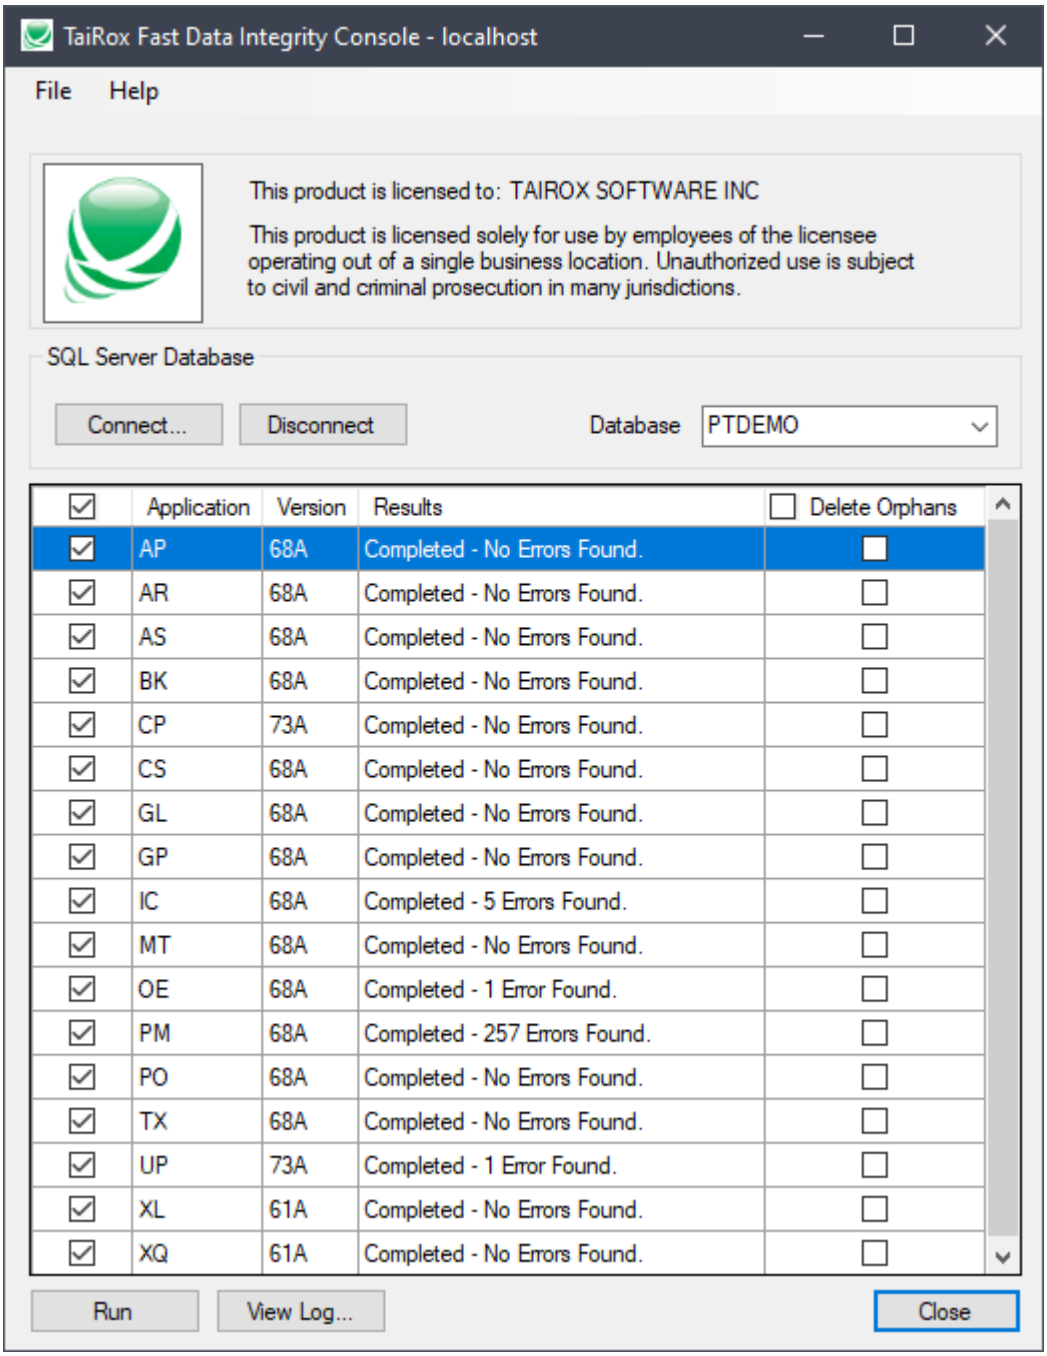
Limit checks to eliminate "noise" from the error log - errors that will not affect current operations. Extend checks to call out errors that can affect current operations.



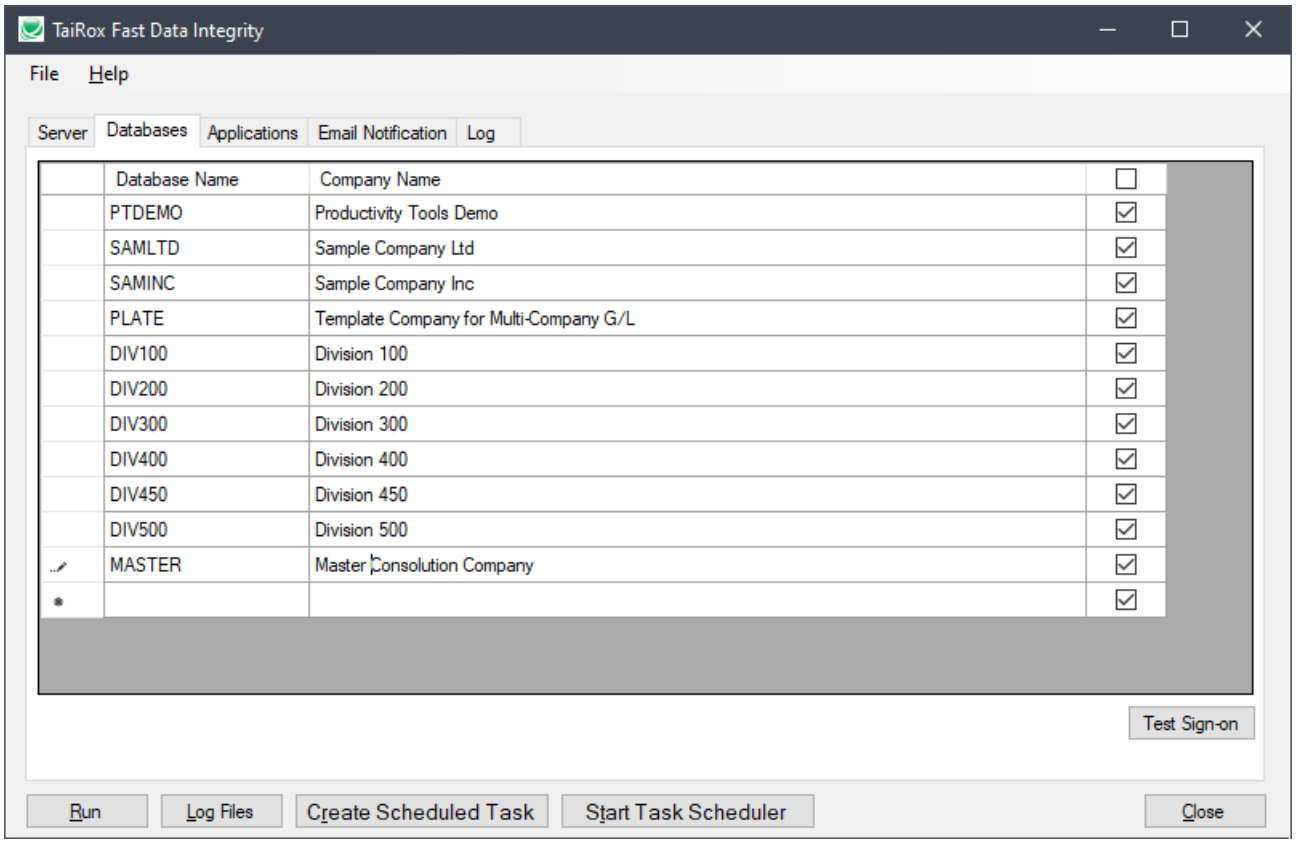
Fast Data Integrity for Sage 300

Fast Data Integrity Interactive Console

- Performs checks on Sage 300 core modules and several third-party modules.
- Deletes orphan records, selectable by module.



Fast Data Integrity for Sage 300

Fast Data Integrity Scheduled


- Performs checks on Sage 300 core modules and several third-party modules
- Is designed to run as a Windows Scheduled Task and will create that task.
- Checks multiple databases in a single operation.
- Sends email notifications with a log attached for each company checked.
