

Fast Data Integrity for Sage 300

Available for \$795 + \$200 per year, Fast Data Integrity performs Sage 300 integrity checking operations in a fraction of the time taken by the standard utilities. Tests on large databases show 100x-1000x performance gains. **Interactive** and **schedulable** versions of the program are provided.

Watch an overview: <https://vimeo.com/605846172>

"I would just like to say ... WOW! On the client's largest entity, over 200 gig, it typically takes a day to run a DI on just one of the modules (AR, AP or GL). It ran in 6 minutes on AR! I can also say it found and reported on the errors that I was expecting."

Kimberly Kyle, Sage 300 Certified Consultant.

"The native data integrity ... took over 3 days ... Fast Data Integrity ... less than 1.5 hours."

Bruce Warrell, NextLevel Information Solutions.

"Subject: Re: Fast Data Integrity ... Darn that thing is fast !!!!!!"

Paul Field, Net@Work.

Options

Limit checks to eliminate "noise" from the error log - errors that will not affect current operations. Extend checks to call out errors that can affect current operations.

The screenshot shows a 'Settings' dialog box with the following options:

- Log Folder: C:\Users\User\Documents
- Maximum number of errors to log per test: 0 (0 = log all)
- Radio buttons for transaction checking:
 - Check transactions for all fiscal years
 - Only check transactions in fiscal year 2023 and later
- Check inactive records:
- Check for missing required optional fields:
- Check completed transactions:

Buttons: OK, Cancel

Fast Data Integrity for Sage 300

Fast Data Integrity Interactive Console

- Performs checks on Sage 300 core modules and several third-party modules.
- Deletes orphan records, selectable by module.
