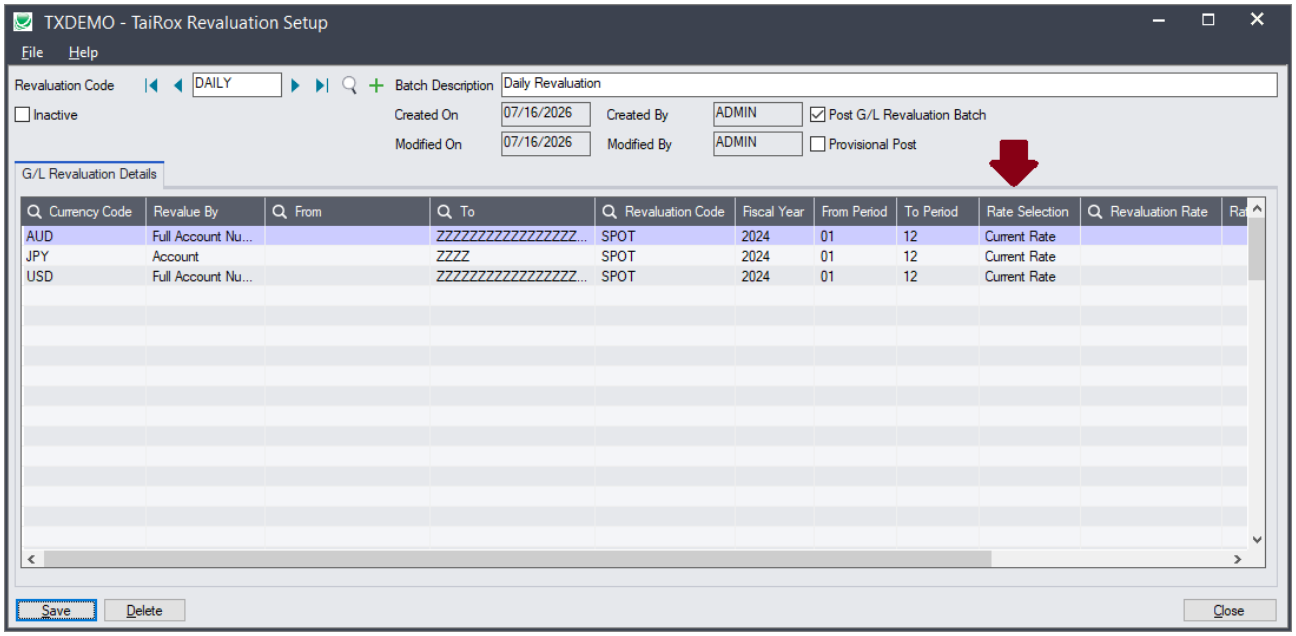
TaiRox Revaluation for Sage 300

Available for $1195 + $300 per year, TaiRox Revaluation stores revaluation details in a database table keyed to a code, saving time and reducing errors. Processing the revaluation is then reduced to selecting a code and pressing the Process button.



Features and Benefits

- Avoids re-keying the same options every time revaluations are calculated.
- Stored settings include an option to use current rates.
- Creates and optionally posts revaluation batches.
- Schedule to revalue multiple companies in multiple ways in a single step.
- Creates a basic Windows Scheduled Task and will launch the Task Scheduler.

Platform Requirements

- Sage 300 2018 to 2026: A single executable program works with all platforms
- .NET Framework 4.7.2 or higher is required.
- Visual C++ 2013 Redistributable (x86) - 12.0.30501 or higher is required.
